Synopsis

The Red Dragon & The West Wind is the perfect introduction to this ancient game of strategy and subterfuge, covering all aspects of the two most common varieties, American and Chinese, along with an overview of other global approaches. Customer Reviews

This book, while claiming to be written for beginners, is inundated with what comes across as the authors arrogance and preference for advanced players as well as the importance of strictly adhered to rules over the relationships of friends seated at the table. While this may be appropriate for a Mah-Jongg player who wishes to increase his/her skill and advance into tournament play, it is not written for family and friends who play on the weekends as a social event. The writing is technical and dry and filled with an abundance of nit-picky information best left to someone who already has a basic understanding of the game. For example I can't imagine inviting family or friends over to my house to play only to force them to follow these stipulations:"Declaring a pung more than 3 seconds after a tile was discarded is penalized first by a warning; a second occurrence penalized by loss of 5 points." p.143"If you find yourself struggling with a jumble of disassociated tiles...others will start to cough, Roll their eyes, and drum their fingernails impatiently. If this happens pass any three tiles. Just try not to let any more fingernails drum, eyes roll, any more throats to

tighten into subtle coughs...The beginner who tries to win may win a few times, but they won't be invited back to play again" p.110."Do not carry on a conversation while playing. Don't fidget. Don't be the slowest playing at the table. Pay attention and act when you are supposed to act" p.202I give this book two stars because it is appropriate as a rule book in the event that a question arises during play, but that is all. Learning to play with this book would only lead the beginner to feel frustrated and ultimately unwelcome at the table of those who already know how to play.
